Dear Dr. ,

Our mutual patient's recent lab results indicate that he/she requires iron infusions. We have arranged for 5 iron sucrose infusions. The patient will have retesting 8 weeks following the last infusion, and we have provided the lab requisition for this.

If you have any questions or concerns, please feel free to contact me at 780-492-8691 ext. 1.

Sincerely,

**Dictated, but not read
