

# Surveillance recommendations for patients with Colitis

**BIOPSY PROTOCOL**  
Pancolonic dye spraying with targeted biopsy of abnormal areas is recommended, otherwise 2-4 random biopsies from every 10 cm of the colorectum should be taken

**OTHER CONSIDERATIONS**  
Patient preference, multiple post-inflammatory polyps, age & comorbidity, accuracy & completeness of examination

CRC – colorectal cancer  
FDR – first degree relative  
PSC – primary sclerosing cholangitis
